

CIT RELAY & SWITCH offers the AH Series 19mm Pushbutton Switch. This panel mount switch is momentary with SPST NO plus SPST NC. The AH Series is both splash and vandal proof, with flush actuator styles offering non-illuminated, bi-color ring illumination or dot illumination. Bi-colored illumination choices are Red, Yellow, Green, Blue, White and Orange.

CIT RELAY & SWITCH offers the rugged CH Series LED illuminated pushbutton switch in stainless steel, polished nickel plate along with black anodized aluminum. Functions include momentary or alternate action in SPDT or DPDT configurations. Illumination includes center dot or ring illumination feature red, yellow, green, blue, white and orange LED voltages, inclusive of 6VDC up to 220VAC. This vandal and water resistance switch offers panel cutout of 16mm; width of switch face including the bezel is 18mm.

CIT RELAY & SWITCH introduces the DH Series in 22mm and 25mm size. This addition to the CIT panel mount switch line is heavy-duty and rugged in construction - both splash and vandal proof. The DH series is available as momentary or latching in both SPST and DPST, normally open and normally closed. Flush actuator styles offer non-illuminated, bi-color ring illumination or dot illumination. Illumination color choices are Red, Yellow, Green, Blue and White.
